

CAMCO WINTER BAN 100 ANTIFREEZE

Supreme RV Antifreeze, Safe, Odorless, Tasteless, Contains Propylene Glycol Protects to 100 degrees Fahrenheit below zero (-73.3 degrees C) when used full strength, Economical All Purpose.

1. Units under 18ft – 2 US gallons*
2. Units 18-28ft – 3 gallons*
3. Cottages – 3 gallons or more as needed*

**Providing water heater is by-pass mode*

Winter Ban -100 can be used as a winterizing medium for boat engines. Follow specific manufacturer's recommendations. It can also be used for water RV heating systems.

Protection

1 gallon with added water, -100 degrees F (73.3 degrees C)

1 gallon with 1 gallon of water added, -50 degrees F (-45.5 degrees centigrade)

1 gallon with 2 gallons of water added, 0 degrees F (-18.8 degrees centigrade)

It can be diluted with more water but proper care should be taken to ensure maximum temperature protection.

Water Ban -100 inhibits fouling, corrosion while helps to lubricate pumps and valves throughout the entire system.

Directions for Winterizing

1. Turn off water supply to unit or dwelling.

2. Drain system by turning on water taps and let them flow until fresh water supply is exhausted, remove water from toilet bowl and tank.
3. Remove water from water lines by attaching a blow-out plug to water intake fitting and applying air pressure.
4. Close all taps.
5. In RVs and Boats empty holding tanks and close termination valves.
6. If you have a water filter remove filter.
7. Drain water heater, if your are by-passing water heater, refer to by-pass kit instructions before proceeding.
8. Pour the amount of antifreeze needed for your system directly into your fresh water tank or back feed it through a faucet.
9. Starting with faucet nearest to water tank, turn on each faucet and allow to run until pure antifreeze appears. Let about 1 cup of antifreeze run into each tap before turning off faucet. If your toilet is permanently installed, flush until coloured fluid is seen.
10. Be sure all faucets and drains are closed. Check for any leaks in system.

Directions for de-winterizing

Open all taps and run fresh water through system for five to ten minutes until all colour disappears.

Price per bottle of 3.8 litres
Carriage £13.70 for up to 2 bottles
