THIS COULD HAPPEN TO YOU!!

After we had disposed of our older motorhome we purchased pre-owned C-Class to enable us to continue with our travels within the USA but unfortunately on the night of 12-13 February disaster struck and our dream ended rather abruptly.

We were set to travel out on the 13 February but the fire ended that. We had a lot of items moved into the unit ready for the trip including much of our clothing. We think the whole thing is covered by insurance including the other damage to things like our very personal belongings.

These pictures show the absolute devastation our motorhome and also the one parked alongside. The local fire station did an absolutely excellent job in containing the fire but that was all they could do. These older motorhomes are full of highly combustible material and once they catch fire there is not a lot you do about.

We had hoped to attend the Brits' Rally in Arizona in the motorhome but we did manage to visit it and take some pictures and write up.

We will be looking for another coach now so that we can get out and about again.
