# WOODA FARM HOLIDAY PARK

SatNav users - see note below!

OPEN: April through October

Telephone: 01288 352069

Email: enquiries@wooda.co.uk

### DIRECTIONS:

**(A) From the M5 at Exeter:** take the A30 towards Okehampton. Just past Okehampton at the top of a long hill, take the slip road signposted to Bude and follow signs to the A3072. On reaching a T-junction with the A39 at Stratton, turn right and follow the A39 for 100 metres where you should see a large sign on your left, pointing left, stating 'Wooda - 1 mile'. Turn left and after one mile, there is a crossroads near the village of Poughill (pronounced 'Poffle'), carry straight on and Wooda Farm Park is 100 metres further on, on the right.

**(B) Alternatively,** leave the M5 at Junction 27 and follow the North Devon Link Road to Barnstaple and Bideford. On the A39, pass through Kilkhampton and after four miles you will see a filling station on the right. Take the next right. Drive for one mile past the crossroads and Wooda Farm Park is 100 metres further on, on your right.

**SatNav Note:** If you are following Route A instructions above - IGNORE further SatNav instructions as soon as you arrive in Stratton Village. If you are following Route B instructions travelling South on the A39 (from Barnstaple), please avoid Stone Hill (shown on the bottom map) and continue on the A39 south until you see signs for Wooda.

Mo and Dick visited this site in May 2016 but before we start our report, please let me stress once again, the warning concerning the use of SatNavs. Please use the travel directions supplied by the site management - those directions will lead you to a nice easy site entrance! Unfortunately there weren't any RVs on site so we used our 23ft Ducato Swift Bolero on one of the longer pitches to give you an idea of the overall pitch length

Having turned into the site entrance you will approach the Reception Block where you are faced with a left-turn into the Arrivals area situated in the car park. There is a slight rise up the road into the car park so when you have booked in and been given 'pitch' directions, you will need to reverse back out of the car park to get onto the site roads - failure to do so will probably result in scraping your rear-end on the rise in the road!

Most of the RV-sized pitches that we saw were gravel-based Premier Pitches complete with a 16amp hook-up, a fresh water tap and a grey tank drain on each pitch. On site there are two well sign-posted drive-over black tank dump points (man-hole covers) with a fresh water supply adjacent. There are quite a few pitches that would happily take a 36ft RV and some, especially Premier pitch one (P1) that would take a 40ft'er - but management at Wooda Farm have restricted overall length to 36ft - so if you are longer than that, simply telephone them and ask if they will let you in - you might be surprised! The gravelled area on most of the Premier pitches is at least 16ft (5m) wide and 34ft (10m plus long) with a 16ft (5m) grass strip on one side - all of which adds up to a very easy pitch to reverse onto with ample car parking space alongside as well as a grass sitting-out area.

Leisure activities cover such extremes as an Archery range, Pitch and Putt golf, a fishing lake, a kite-flying area, tennis courts, a sports barn and a fitness suite, as well as a 'toddler' play zone and one of the most interesting children play areas that I have ever seen, with half-size models of a motorhome, a land-rover and a tractor and trailer as well as a mammoth fort-style aerial walkway. There is an on-site restaurant, a pub and a separate take-away food shop.

The picturesque beaches around Bude are just over a mile away with Sandymouth beach just over 2 miles away in the other direction. Should you wish to use the site facilities blocks, you will be utterly spoilt for choice and cleanliness, from a superbly appointed baby-changing room to a fresh-water dog shower situated behind one of the facility blocks. Yes, we were there at the beginning of the season but Mo and I know enough about campsites to know that the facilities on this site are well designed, well-built and no matter what time of the season you are there, you can bet your bottom dollar those facilities will be scrupulously clean.

Mo and I were so impressed with this site that we booked on for a longer stay and that coming from us is highly complimentary indeed - top marks to Wooda Farm Holiday Park Staff and Management.

Max RV: 36ft / EHU: 16amps / Base: Gravel super-pitches / Black tank dump
